WHAT IS THE IMPACT OF CHRONIC DISEASE ON AMERICA?

FightChronicDisease.org/pfcd-in-the-states

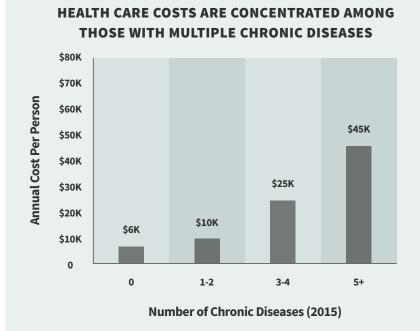

Projected total cost of chronic disease 2016-2030 in America

\$42 TRILLION

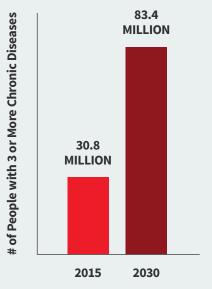

In 2015, 191 million people in America had at least 1 chronic disease, 75 million had 2 or more chronic diseases.

Chronic diseases could cost America \$2 trillion in medical costs and an extra \$794 billion annually in lost employee productivity (average per year 2016-2030).

5% OF PEOPLE ACCOUNT FOR 50% OF HEALTH CARE SPENDING IN AMERICA...

NUMBER OF PEOPLE WITH 3+ CHRONIC DISEASES IS GROWING

¹ SB Cohen, "The Concentration and Persistence in the Level of Health Expenditures over Time: Estimates for the U.S. Population, 2012- 2013." Statistical Brief #481. AHRQ, Sept. 2015. http://meps.ahrq.gov/mepsweb/data_files/publications/st481/stat481.pdf

\$8,600 PER PERSON

Projected per person medical and productivity cost of chronic disease in 2030 if current trends continue

In America, 1,100,000 lives could be saved annually through better prevention and treatment of chronic disease.

Now is our chance to make a difference. Simple changes can prevent new cases of chronic disease and save money for America.

Behavioral Changes

Assuming modest changes in healthy behavior and care delivery:

Improve treatment rates
Increase physical activity
Reduce smoking
Reduce obesity

\$116 billion saved a year

Treatment Advances

Assuming optimistic changes and new treatment breakthroughs:

Delay Alzheimer's onset Improve cancer survival Better treatment effectiveness Improve care delivery

\$418 billion saved a year

Total Savings

\$6.3 TRILLION

in America 2016-2030 if improvements are made in prevention and treatment.

Medical breakthroughs can and will transform lives and save health care costs over the next 15 years across the United States.		U.S.
	Prevented Cases of Chronic Disease	169 Million
	Total Cost Avoided	\$6 Trillion
	Lives Saved	16 Million

NOTE: The above outcomes are averages of annual outcomes across 2016-2030. All estimates are based on a microsimulation analysis conducted by IHS Life Sciences. For additional information on methodology, please visit www.ihs.com/industry/life-sciences.html.
