

Dr. Mehmet Oz, MD
Administrator
Centers for Medicare and Medicaid Services
200 Independence Ave., S.W.
Room 314-G
Washington, D.C. 20201

Dear Dr. Oz:

Congratulations on your confirmation as the Administrator of the Centers for Medicare and Medicaid Services. We share your goal to lessen the burden of chronic illness in America and look forward to working with you to achieve it. [The Partnership to Fight Chronic Disease](#) (PFCDD) is an internationally recognized coalition of patients, providers, community organizations, business and labor groups, and health policy experts. Since our founding in 2007, we have supported research and policies to better understand, prevent and combat chronic disease.

Ninety cents of every health care dollar spent in the U.S. is directed to chronic diseases, including obesity. You recently called it "the patriotic duty of all Americans to take care of themselves ...because healthy people don't consume health care resources."¹ Likewise, Department of Health and Human Services Secretary Robert F. Kennedy Jr. has consistently drawn the causal relationship that connects obesity with other chronic diseases. We applaud the focus and look forward to working together to help address these challenges.

We kindly request a meeting with your staff to discuss how we may deliver upon our shared desire for a healthier America.

In addition, we have included below a sign-on petition PFCDD recently organized. The 646 signees pledged their support for expanding Medicare and Medicaid access to FDA-approved anti-obesity medication as an important tool in the fight to reduce obesity and related chronic illnesses. Our Chair, Ken Thorpe, PhD, has [published work](#) showing the potential savings to Medicare from reducing obesity among beneficiaries. These opportunities are among the issues we hope to discuss at a date and time most convenient for your staff.

Sincerely,

Candace DeMatteis, JD MPH
Vice President, Policy

PARTNERSHIP TO FIGHT CHRONIC DISEASE

Petition

In support of the Trump administration's focus on reducing waste and fighting chronic disease, we the undersigned request that Medicare and Medicaid become more efficient and impactful by allowing patients access to anti-obesity medication.

Today, more than 40% of American adults live with obesity. The disease is associated with a rise in diabetes, heart disease and other chronic diseases that account for 90% of health care spending. There is no easy fix to the public health emergency, but to mitigate obesity and its related consequences, patients and their doctors deserve to have affordable options on the table that reflect some of the groundbreaking progress made in scientific innovation.

These treatments can pay long-term dividends.

New anti-obesity medications like GLP/GIP treatments have been clinically found to reduce body weight by up to 20 percent and improve overall health outcomes. Expanding access can reduce preventable hospitalizations, drive long-term savings, and help Americans live healthier lives while easing the toll obesity takes on our health care system.

Obesity is disproportionately prevalent in low-income communities. So, addressing the financial barrier to these treatments is critical for the potentially life-saving medicine to reach the Americans who would benefit the most.

Thank you for considering this opportunity to have a profound impact on our nation's public health. Making America healthy cannot wait.
