Greater adherence to diabetes drugs is linked to less hospital use and could save nearly \$5 billion annually. Health Affairs, 31(8), 1836-1846.

Due to rounding, numbers presented may not sum precisely to the totals provided.

\*Estimates included only the commercially insured adult diabetes patient population taking brand diabetes medicines. Rebates include steep discounts health plans & PBMs negotiated to save on brand medications. ## Sharing even half the rebates for diabetes medicines would save money for both health plans and people taking the medicines.

SAVINGS IF HALF THE REBATE IS SHARED WITH PATIENTS	MEDICAL AND NET DRUG SAVINGS (2018 \$US)		
	TOTAL SAVINGS	SAVINGS FOR PATIENTS	SAVINGS FOR HEALTH PLANS
Annual Per Person Savings	\$442	\$377	\$65
Average Annual Savings for Full Population	\$253.5 Million	\$216.2 Million	\$37.3 Million

As adherence improves, health plans spend more on medicines for diabetes, but those costs are more than offset by reduced medical spending from preventing diabetes-related complications.
